

# ANTIFREEZE/COOLANT HT-FVA READY MIX

## SAFETY DATA SHEET

Compiled in accordance with REACH Regulation (EC) No 1907/2006, as retained and amended in UK law

ISSUE DATE: 26.01.2022  
REVISION DATE: 29.08.2024  
SUPERSEDES: 04.04.2024  
**VERSION: 3.0**

### SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1. Product identifier

Product form : Mixture  
Trade name : Antifreeze/Coolant HT-FVA Ready Mix  
Product code : Ford Internal Ref.: 505850  
SDS Number : 9368  
UFI : WGX5-7F3U-M10G-PJ0N  
Product use : Professional use

#### 1.2. Relevant identified uses of the substance or mixture and uses advised against

##### 1.2.1. Relevant identified uses

Function or use category : Antifreeze

##### 1.2.2. Uses advised against

Restrictions on use : None known

#### 1.3. Details of the supplier of the safety data sheet

##### Supplier

Ford-Werke GmbH  
Edsel-Ford-Str. 2-14  
50769 Cologne  
Germany  
+49 221 90-33333  
sdseu@ford.com

##### Distributor

Ford Motor Company Ltd.  
Parts Distribution Centre  
Royal Oak Way South  
NN11 8NT Daventry, Northants  
United Kingdom  
+44 1327 305 198

#### 1.4. Emergency telephone number

+49 (0) 6132-84463 (GBK GmbH – 24/7)

### SECTION 2: Hazards identification

#### 2.1. Classification of the substance or mixture

Classification according to The Chemicals (Health and Safety) and Genetically Modified Organisms (Contained Use) (Amendment etc.) (EU Exit) Regulations

|                |                                                                                                        |              |                                                                                                |
|----------------|--------------------------------------------------------------------------------------------------------|--------------|------------------------------------------------------------------------------------------------|
| Health hazards | Acute toxicity (oral), Category 4<br>Specific target organ toxicity –<br>Repeated exposure, Category 2 | H302<br>H373 | Harmful if swallowed.<br>May cause damage to organs through<br>prolonged or repeated exposure. |
|----------------|--------------------------------------------------------------------------------------------------------|--------------|------------------------------------------------------------------------------------------------|

Full text of H- and EUH-statements: see section 16

#### Adverse physicochemical, human health and environmental effects

No additional information available

#### 2.2. Label elements

Labelling according to The Chemicals (Health and Safety) and Genetically Modified Organisms (Contained Use) (Amendment etc.) (EU Exit) Regulations

##### Hazard pictograms

##### Signal word

Warning

**Contains**

Ethanediol

**Hazard statements**

H302

Harmful if swallowed.

H373

May cause damage to organs through prolonged or repeated exposure.

**Precautionary statements****Prevention**

P264

Wash hands thoroughly after handling.

P270

Do not eat, drink or smoke when using this product.

**Response**

P301+P312

IF SWALLOWED: Call a POISON CENTER, doctor if you feel unwell.

**2.3. Other hazards**

This substance/mixture does not meet the PBT criteria of REACH regulation, annex XIII.

This substance/mixture does not meet the vPvB criteria of REACH regulation, annex XIII.

The mixture does not contain substance(s) included in the list established in accordance with Article 59(1) of REACH for having endocrine disrupting properties, or substance(s) are not identified as having endocrine disrupting properties in accordance with the criteria set out in Commission Delegated Regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at a concentration equal to or greater than 0,1 %

**SECTION 3: Composition/information on ingredients****3.2. Mixtures**

Comments

: #: substance with a Community workplace exposure limit

Full text of H- and EUH-statements: see section 16

**SECTION 4: First aid measures****4.1. Description of first aid measures**

First-aid measures general

: Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Never give anything by mouth to an unconscious person.

First-aid measures after inhalation

: Remove person to fresh air and keep comfortable for breathing. Get medical advice/attention.

First-aid measures after skin contact

: Take off immediately all contaminated clothing and wash it before reuse. Wash immediately with plenty of water. Get medical advice/attention.

First-aid measures after eye contact

: Rinse immediately and thoroughly, pulling the eyelids well away from the eye (15 minutes minimum). Remove contact lenses, if present and easy to do. Continue rinsing. Call a physician immediately.

First-aid measures after ingestion

: Do not induce vomiting. Rinse mouth thoroughly. Get immediate medical advice/attention.

**4.2. Most important symptoms and effects, both acute and delayed**

Symptoms/effects after ingestion

: May cause damage to organs (kidneys) (oral). Harmful if swallowed.

**4.3. Indication of any immediate medical attention and special treatment needed**

Treat symptomatically.

## SECTION 5: Firefighting measures

### 5.1. Extinguishing media

|                                |                                                                          |
|--------------------------------|--------------------------------------------------------------------------|
| Suitable extinguishing media   | : Dry chemical, CO <sub>2</sub> , or water spray or regular foam.        |
| Unsuitable extinguishing media | : Do not use water jet as an extinguisher, as this will spread the fire. |

### 5.2. Special hazards arising from the substance or mixture

|                                                  |                                                         |
|--------------------------------------------------|---------------------------------------------------------|
| Fire hazard                                      | : During fire, gases hazardous to health may be formed. |
| Hazardous decomposition products in case of fire | : Carbon oxides (CO, CO <sub>2</sub> ). Metal oxides.   |

### 5.3. Advice for firefighters

|                                |                                                                                                                                                                      |
|--------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Firefighting instructions      | : Move containers from fire area if it can be done without personal risk. Use standard firefighting procedures and consider the hazards of other involved materials. |
| Protection during firefighting | : Do not attempt to take action without suitable protective equipment. Self-contained breathing apparatus. Complete protective clothing.                             |

## SECTION 6: Accidental release measures

### 6.1. Personal precautions, protective equipment and emergency procedures

#### 6.1.1. For non-emergency personnel

|                      |                                                                                                                                                                                                                                                              |
|----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Protective equipment | : Wear appropriate protective equipment and clothing during clean-up. Use personal protection recommended in Section 8 of the MSDS.                                                                                                                          |
| Emergency procedures | : Ventilate spillage area. Evacuate unnecessary personnel. Avoid contact with skin, eyes and clothing. Local authorities should be advised if significant spillages cannot be contained. Wear appropriate protective equipment and clothing during clean-up. |

#### 6.1.2. For emergency responders

|                      |                                                                                                      |
|----------------------|------------------------------------------------------------------------------------------------------|
| Protective equipment | : Wear recommended personal protective equipment. For personal protection, see section 8 of the SDS. |
| Emergency procedures | : Keep unnecessary personnel away. Ventilate area.                                                   |

### 6.2. Environmental precautions

Avoid release to the environment. Avoid discharge into drains, water courses or onto the ground. Prevent further leakage or spillage if safe to do so. Inform appropriate managerial or supervisory personnel of all environmental releases.

### 6.3. Methods and material for containment and cleaning up

|                         |                                                                                                                                                                                                                                                                                                                                                                                                                             |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| For containment         | : Stop leak without risks if possible. Move containers from fire area if it can be done without personal risk.                                                                                                                                                                                                                                                                                                              |
| Methods for cleaning up | : Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. Small spills: Take up liquid spill into absorbent material. Clean surface thoroughly to remove residual contamination. Never return spills in original containers for re-use. |
| Other information       | : Dispose of materials or solid residues at an authorized site.                                                                                                                                                                                                                                                                                                                                                             |

### 6.4. Reference to other sections

For further information refer to section 8: "Exposure controls/personal protection". For disposal of residues refer to section 13 : "Disposal considerations".

## SECTION 7: Handling and storage

### 7.1. Precautions for safe handling

|                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Precautions for safe handling | : Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Ground/bond container and receiving equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Flammable vapours may accumulate in the container. Use explosion-proof equipment. Wear personal protective equipment. Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Use only outdoors or in a well-ventilated area. Avoid breathing dust/fume/gas/mist/vapours/spray. Avoid release to the environment. Avoid contact with skin, eyes and clothing. |
| Hygiene measures              | : Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Observe good industrial hygiene practices.                                                                                                                                                                                                                                                                                                                                                                                         |

## 7.2. Conditions for safe storage, including any incompatibilities

|                        |                                                                    |
|------------------------|--------------------------------------------------------------------|
| Technical measures     | : Ensure adequate ventilation, especially in confined areas.       |
| Storage conditions     | : Store locked up. Store in a dry, cool and well-ventilated place. |
| Incompatible materials | : Oxidation agents.                                                |
| Maximum storage period | : 60 months                                                        |
| Storage temperature    | : > -35 °C                                                         |

## 7.3. Specific end use(s)

Antifreeze.

## SECTION 8: Exposure controls/personal protection

### 8.1. Control parameters

#### 8.1.1. National occupational exposure and biological limit values

|                              |
|------------------------------|
| <b>Ethanediol (107-21-1)</b> |
|------------------------------|

#### EU - Indicative Occupational Exposure Limit (IOEL)

|                      |                                 |
|----------------------|---------------------------------|
| Local name           | Ethylene glycol                 |
| IOEL TWA             | 52 mg/m <sup>3</sup><br>20 ppm  |
| IOEL STEL            | 104 mg/m <sup>3</sup><br>40 ppm |
| Remark               | Skin                            |
| Regulatory reference | COMMISSION DIRECTIVE 2000/39/EC |

#### United Kingdom - Occupational Exposure Limits

|                      |                                                                                                                                                             |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Local name           | Ethane-1,2-diol                                                                                                                                             |
| WEL TWA (OEL TWA)    | 10 mg/m <sup>3</sup> particulate<br>52 mg/m <sup>3</sup> vapour<br>20 ppm vapour                                                                            |
| WEL STEL (OEL STEL)  | 104 mg/m <sup>3</sup> vapour<br>40 ppm vapour                                                                                                               |
| Remark               | Sk (Can be absorbed through the skin. The assigned substances are those for which there are concerns that dermal absorption will lead to systemic toxicity) |
| Regulatory reference | EH40/2005 (Fourth edition, 2020). HSE                                                                                                                       |

#### 8.1.2. Recommended monitoring procedures

No additional information available

#### 8.1.3. Air contaminants formed

No additional information available

#### 8.1.4. DNEL and PNEC

#### Disodium sebacate (17265-14-4)

#### DNEL/DMEL (Workers)

|                                          |                         |
|------------------------------------------|-------------------------|
| Long-term - systemic effects, dermal     | 10 mg/kg bw/day         |
| Long-term - systemic effects, inhalation | 35.26 mg/m <sup>3</sup> |

#### DNEL/DMEL (General population)

|                                          |                       |

**8.1.5. Control banding**

No additional information available

**8.2. Exposure controls****8.2.1. Appropriate engineering controls****Appropriate engineering controls:**

Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

**8.2.2. Personal protection equipment****Personal protective equipment:**

Personal protective equipment should be chosen according to the CEN standards and in discussion with the supplier of the protective equipment.

**8.2.2.1. Eye and face protection****Eye protection:**

Safety glasses with side shields. EN 166.

#### 8.2.2.2. Skin protection

##### Skin and body protection:

Wear suitable protective clothing. Long sleeved protective clothing. EN 14605. EN ISO 13982

##### Hand protection:

Protective gloves. ISO 374-1. The recommendation is only valid for the supplied product and the stated application. Special working conditions, like heat or mechanical strain, which deviate from the test conditions, can reduce the protective effect provided by the recommended glove

| Material                                           | Permeation        | Thickness (mm) | Comments                                                                                                                                                 |

| In case of splash contact:<br>Nitrile rubber (NBR) | 6 (> 480 minutes) | 0,4            | Glove recommendation: Camatril Velours® 730 (Kächele-Cama GmbH, source of supply see <a href="http://www.kcl.de">www.kcl.de</a> ) or comparable product. |

#### Other skin protection

##### Materials for protective clothing:

Personal protective equipment should be chosen according to the CEN standards and in discussion with the supplier of the protective equipment

#### 8.2.2.3. Respiratory protection

##### Respiratory protection:

If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn. Extra personal protection: A/P2 filter respirator for organic vapour and harmful dust

#### 8.2.2.4. Thermal hazards

##### Thermal hazard protection:

Wear appropriate thermal protective clothing, when necessary.

#### 8.2.3. Environmental exposure controls

##### Environmental exposure controls:

Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases.

##### Other information:

Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

## SECTION 9: Physical and chemical properties

### 9.1. Information on basic physical and chemical properties

|                             |                                               |
|-----------------------------|-----------------------------------------------|
| Physical state              | : Liquid                                      |
| Colour                      | : Purple.                                     |
| Odour                       | : Characteristic.                             |

| Particle dustiness              | : Not applicable                         |

## 9.2. Other information

### 9.2.1. Information with regard to physical hazard classes

No additional information available

### 9.2.2. Other safety characteristics

VOC content : 48 %

## SECTION 10: Stability and reactivity

### 10.1. Reactivity

The product is non-reactive under normal conditions of use, storage and transport.

### 10.2. Chemical stability

Stable under normal conditions.

### 10.3. Possibility of hazardous reactions

No dangerous reactions known under normal conditions of use. Reacts with : Oxidizing agent.

### 10.4. Conditions to avoid

No additional information available

### 10.5. Incompatible materials

Oxidizing agent.

### 10.6. Hazardous decomposition products

No additional information available

## SECTION 11: Toxicological information

### 11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

|                             |                                                                    |
|-----------------------------|--------------------------------------------------------------------|
| Acute toxicity (oral)       | : Based on available data, the classification criteria are not met |
| Acute toxicity (dermal)     | : Based on available data, the classification criteria are not met |
| Acute toxicity (inhalation) | : Based on available data, the classification criteria are not met |

| Antifreeze/Coolant HT-FVA Ready Mix |                         |
|-------------------------------------|-------------------------|

| Respiratory or skin sensitisation | : Based on available data, the classification criteria are not met                     |

|                        |                                                                      |
|------------------------|----------------------------------------------------------------------|
| Germ cell mutagenicity | : Based on available data, the classification criteria are not met   |
| Carcinogenicity        | : Based on available data, the classification criteria are not met   |
| Reproductive toxicity  | : Based on available data, the classification criteria are not met   |
| STOT-single exposure   | : Based on available data, the classification criteria are not met   |
| STOT-repeated exposure | : May cause damage to organs through prolonged or repeated exposure. |

| Ethanediol (107-21-1)               |                                                                                     |
|-------------------------------------|-------------------------------------------------------------------------------------|
| NOAEL (oral, rat, 90 days)          | 150 mg/kg bodyweight/day                                                            |
| STOT-repeated exposure              | May cause damage to organs (kidneys) through prolonged or repeated exposure (oral). |
| Aspiration hazard                   | : Based on available data, the classification criteria are not met                  |
| Antifreeze/Coolant HT-FVA Ready Mix |                                                                                     |
| Viscosity, kinematic                | 3.7 – 4 mm <sup>2</sup> /s @ 20°C                                                   |

## 11.2. Information on other hazards

### 11.2.1. Endocrine disrupting properties

### 11.2.2. Other information

Potential adverse human health effects and symptoms : Exposure may produce an allergic reaction, Information on Effects: refer to section 4

## SECTION 12: Ecological information

### 12.1. Toxicity

|                                                           |                                                                                                                                                                                                      |
|-----------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Ecology - general                                         | : The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment. |
| Hazardous to the aquatic environment, short-term (acute)  | : Based on available data, the classification criteria are not met                                                                                                                                   |
| Hazardous to the aquatic environment, long-term (chronic) | : Based on available data, the classification criteria are not met                                                                                                                                   |

### 12.2. Persistence and degradability

No additional information available

### 12.3. Bioaccumulative potential

#### Ethanediol (107-21-1)

|         |       |
|---------|-------|
| Log Pow | -1.36 |
|---------|-------|

### 12.4. Mobility in soil

No additional information available

### 12.5. Results of PBT and vPvB assessment

#### Antifreeze/Coolant HT-FVA Ready Mix

This substance/mixture does not meet the PBT criteria of REACH regulation, annex XIII.

This substance/mixture does not meet the vPvB criteria of REACH regulation, annex XIII.

### 12.6. Endocrine disrupting properties

No additional information available

### 12.7. Other adverse effects

Other adverse effects : No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this product

## SECTION 13: Disposal considerations

### 13.1. Waste treatment methods

Regional waste regulation : Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions). Dispose of in accordance with local regulations.

|                                           |                                                                                                                                                                                                                                                                                                                   |
|-------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Waste treatment methods                   | : Collect and reclaim or dispose in closed containers at licensed waste disposal site. Do not contaminate ponds, waterways or ditches with chemical or used container. Do not allow to enter drains or water courses. Dispose of contents/container in accordance with licensed collector's sorting instructions. |
| European List of Waste (LoW, EC 2000/532) | : The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.<br>16 01 14* - antifreeze fluids containing dangerous substances<br>15 01 10* - packaging containing residues of or contaminated by dangerous substances                                         |

## SECTION 14: Transport information

In accordance with ADR / IMDG / IATA / ADN / RID  
Not regulated for transport

## SECTION 15: Regulatory information

### 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

#### 15.1.1. EU-Regulations

##### EU restriction list (REACH Annex XVII)

| Reference code                                                                                                                   | Applicable on                                                                                                                                                                                                                                                                                                                                                                                        |

| VOC content                                                                                                                      | : 48 %                                                                                                                                                                                                                                                                                                                                                                                               |
| Other information, restriction and prohibition regulations :                                                                     | Directive 94/33/EC on the protection of young people at work, as amended. Directive 98/24/EC on the protection of the health and safety of workers from the risks related to chemical agents at work, as amended. Directive 92/85/EEC on the safety and health of pregnant workers and workers who have recently given birth or are breastfeeding as amended. For details, refer to section 3 and 8. |

#### 15.1.2. National regulations

No additional information available

### 15.2. Chemical safety assessment

No chemical safety assessment has been carried out

## SECTION 16: Other information

#### Indication of changes:

SECTION 2 : Classification. SECTION 3 : Information on ingredients.

#### Abbreviations and acronyms

|                     |                                                                    |
|---------------------|--------------------------------------------------------------------|
| Acute Tox. 4 (Oral) | Acute toxicity (oral), Category 4                                  |
| Eye Irrit. 2        | Serious eye damage/eye irritation, Category 2                      |
| H302                | Harmful if swallowed.                                              |
| H319                | Causes serious eye irritation.                                     |
| H373                | May cause damage to organs through prolonged or repeated exposure. |
| STOT RE 2           | Specific target organ toxicity – Repeated exposure, Category 2     |

#### Classification and procedure used to derive the classification for mixtures according to Regulation (EC) 1272/2008 [CLP]

|                     |      |                    |
|---------------------|------|--------------------|
| Acute Tox. 4 (Oral) | H302 |                    |
| STOT RE 2           | H373 | Calculation method |

*The above information describes exclusively the safety requirements of the product and is based on our present-day knowledge. The information is intended to give you advice about the safe handling of the product named in this safety data sheet, for storage, processing, transport and disposal. The information cannot be transferred to other products. In the case of mixing the product with other products or in the case of processing, the information on this safety data sheet is not necessarily valid for the new made-up material.*

## Attachment to the Safety Data Sheet

**Product Name:** Antifreeze/Coolant HT-FVA Ready Mix

**Ford Int. Ref. No.:** 505850

**Revision Date:** 29.08.2024

---

**Involved Products:**

| Finiscode   | Part number   | Container Size: |
|-------------|---------------|-----------------|
| 1 2 610 440 | MU7J 19544 CA | 5 l             |
